

European Green Mastery: Comparison and development of skills and competences in the green sectors

Project number: 2018-3832/011-001 601226-EPP-1-2018-1-NO-EPPKA2-SSA

Final multiplier event 10.06.2022 10.00 - 12.00

Welcome to the EGREEN conference in Oslo with new opportunities for competence development and certifications targeting sustainability in a circular economy.

The EGREEN Mastery project is about to fulfil the ambitions of cross-sectoral, multilevel, and transnational qualification descriptions. The cross-sectoral dimension is based on the green occupations: floristry, gardening, and landscaping.

Learning Outcomes of the three occupations covering the European Qualifications Framework (EQF) levels 2-6 have been compared and prepared as 15 multilingual matrices. A comprehensive qualification description targeting sustainability comes on top and serves as the basis for training programmes and MOOCs covering eight different aspects of sustainability and circular economy.

The transnational dimension is secured through a broad consortium of partners representing Austria, Estonia, France, Germany, Netherlands, Norway, and Spain, and with the international sector organisation for landscapers, ELCA, on top. The matrices are in multilingual versions and uploaded to the Skillsbank platform.

Our training programmes and MOOCs focus on sustainability and new technologies and are developed as integrated Skillsbank-Canvas services. A multi-step evaluation procedure with self-assessment, programme-based tests, and external/independent assessments, also including validation/recognition of prior learning, will result in skills profiles, diplomas, and certificates.

We welcome you therefore to our final conference. We will present the outcome of three years of work: multilingual tools for companies, learners, and training providers to strengthen the competence of the stakeholders in the Green Sector.
